- ▶ Problem-solving
- ▶ Communication
- ▶ Agile Methodologies
- ▶ Technical Writing
- ▶ Analytical Skills
- ▶ Collaboration
- ▶ Continuous Learning

CERTIFICATIONS

Professional Scrum Master

PSM1

Professional Scrum Developer

PSD1

PROFILE

Software Engineering Consultant with 9 years of experience delivering scalable, high-quality solutions across web development, technical architecture, and consulting environments. I combine deep hands-on engineering expertise with a recently completed MBA from VUB, enabling me to connect technical execution with business strategy, product goals, and stakeholder needs, and to consistently align engineering decisions with broader product and commercial objectives.

Throughout my career, I have helped businesses translate complex requirements into practical, maintainable, and user-focused digital solutions — bridging the gap between technical teams and business stakeholders, and ensuring architecture choices support long-term value creation. My experience spans modern JavaScript frameworks, React, PHP, WordPress, API integrations, testing, and scalable application architecture, and I am particularly drawn to roles in software engineering, technical consulting, solution architecture, and digital transformation where I can contribute both technical depth and strategic thinking.

EDUCATION

Master of Business Administration (MBA)

Vrije Universiteit Brussel (VUB) — Brussels, Belgium

Bachelor of Media and Communication Technologies (Computer Science)

Hogeschool West-Vlaanderen — Kortrijk, Belgium

Industrial Sciences

Vrij Technisch Instituut — Poperinge, Belgium

EMPLOYMENT HISTORY

Software Engineer (for Positive Thinking Company)

November 2020 – Present | Easyfairs

Brussels, Belgium

- Directed proprietary product development to meet client and internal needs, ensuring seamless functionality and superior user satisfaction.
- Facilitated team collaboration initiatives to enhance project methodologies and documentation practices.
- Customised WordPress themes and plugins to align with client specifications, ensuring seamless integration and optimal functionality.
- Managed routine WordPress maintenance operations including updates, backups, and performance enhancements to maximise efficiency.
- Provided comprehensive technical support and troubleshooting for WordPress-related issues, ensuring uninterrupted operations and client satisfaction.

Software Engineering Consultant

September 2020 – Present | Positive Thinking Company

Brussels, Belgium

- Actively consulted with clients to define project requirements, offering expert guidance and strategic recommendations to optimise software delivery and enhance client satisfaction.
- Led internal workshops and training sessions to share specialised knowledge and best practices, empowering team members to excel in their roles.

Full-Stack Developer

July 2017 – August 2020 | Ocular

Zwevezele, Belgium

- Spearheaded immersive audio-visual features, significantly enhancing user engagement.
- Orchestrated design and engineering of an in-house CMS for seamless content interactions.
- Led development of custom CMS platforms, optimising workflow and performance.

Mobile App Developer (Intern)

2016 – 2017 | University of the Western Cape

Cape Town, South Africa

- Led university app development fostering campus micro-communities.
- Mentored CS students to excel in software development.
- Provided stakeholder briefings, ensuring project alignment.
